People have dreamed
of machines, which
would free them from
unpleasant, dull, dirty
and dangerous tasks
and work for them as
servants, for
centuries if not
millennia. Service
robots seem to finally

let these dreams come true. But where are all these robots that eventually serve us all day long, day for day? A few service robots have entered the market: domestic and professional cleaning robots, lawnmowers, milking robots, or entertainment robots. Some of these

Access Free Alias Wavefront

robots look more like toys or gadgets rather than real robots. But where is the rest? This is a question, which is asked not only by customers, but also by service providers, care organizations, politicians, and funding agencies. The answer is not very satisfying.

Today's service
robots have their
problems operating
in everyday
environments. This is
by far more
challenging than
operating an
industrial robot
behind a fence. There
is a comprehensive
list of technical and
scientific problems,
which still need to be

solved. To advance the state of the art in service robotics towards robots, which are capable of operating in an everyday environment, was the major objective of the DESIRE project (Deutsche Service Robotik Initiative – Germany Service Robotics Initiative)
