One of the advantages of the 737  
NG over the 737 Classic is that  
Boeing allow for intermediate  
base C checks before the D check  
to reduce the time, work and  
expense required at the D check.  
Operators that have a  
maintenance programme with a  
P48 check can have a base check  
interval of eight phases (hence  
the name P8), where one phase =  
500FH ...

Maintenance activities for the 737-600/-700/-800/-900 family of airplanes were reduced through improved airplane design, reduced scheduled maintenance, enhanced training, improved technical manuals, and improved access to technical data. Reduced maintenance activities translate directly into lower operating costs for the airlines.
