The vision of the MIT Process Handbook Project is the creation of a systematic and powerful method of organizing and sharing business knowledge. This text presents the key findings of a multidisciplinary research group at MIT's Sloan School of Management.

Knowledge and Practice in Business and Organisations contributes to scholarly understanding of knowledge and practice, mapping the conceptual terrain, providing a critical review of debates in the field and setting out key theoretical perspectives. Knowledge and practice are explored in a range of organisational and policy settings through six context-specific discussions. The collection helps shape the field, identify areas for future research inquiry, and suggest implications for practitioners. The range of sites of inquiry represented in the book (e.g. craft working, accounting, public sector organisations, creative industries, health care, and so on) make the book distinctive, enabling the reader to connect debates and ideas from across a range of sectors and disciplines. The book charts different currents of debate which have hitherto tended to remain unconnected. In one accessible volume, this book provides an excellent introduction to a set of concepts that have animated scholarly conversations across a range of disciplines and provides cases and examples of practices from beyond any one particular sector. In one accessible volume, this book provides an excellent introduction to a set of concepts that have animated scholarly conversations across a range of disciplines and provides cases and examples of practices which come from beyond any one particular sector. Aimed at researchers and academics in the field, this book is valuable source, helping define and progress the scholarly debate.

Provocative and reflective, this volume on the notion of knowledge and innovation in the business industry provides readers with a holistic approach to the subject of 'knowledge'. Structuring their arguments around four case studies of innovation within four entirely different contexts, Håkansson and Waluszewski invite the business-minded reader to consider the costs of adopting new knowledge and innovation within a business setting. This book: questions the long-held assumption that new knowledge and innovation are universally advantageous follows the tremor of an innovation as new knowledge reverberates through, or is dampened by the larger economic community - including cultural structures, the industrial standards and the foundational assumptions that rule a particular economic domain focuses in particular on the interfaces where the innovative agent connects to its customers, suppliers and competitors. An ideal reference source for postgraduate students taking advanced courses in science and technology studies, innovation management, industrial marketing and purchasing, technological development and innovation systems.

In the context of a united Europe the influence of business knowledge has become increasingly relevant, as managers, employees and organisations have to learn new practices and techniques in response to new knowledge and institutions. This book addresses the way in which administrative knowledge is produced, diffused and consumed in Europe by academics, management gurus, publishing houses, consultants and practitioners. It also looks at its impact on European business systems and management practices.

'Arbnor and Bjerke's deep insight into theory construction and their honest appraisal of knowledge creation makes this edition absolutely essential for business scholars. I recommend this book to scholars in any area of business seeking a more thoughtful and useful understanding of research methodology' - Morgan Miles, Professor of Marketing, Georgia Southern University 'These are two authors on top of their game, using their vast experience and depth of knowledge to present a complex topic in a framework which is understandable and usable by anyone doing academic research. This third edition will ensure that this book remains the essential read for social science researchers' - David Carson, Professor of Marketing, University of Ulster Arbnor and Bjerke's best-selling text, first published in 1997, remains unrivalled; both in its contemporary relevance to research methodology, and in its coverage of the interplay between the philosophy of science, methodology and business. The authors make an in-depth examination into the circularity of knowledge and its foundations and analyze the repercussions for business, research and consulting. Where knowledge is a competitive necessity understanding its foundations is a necessity. The Third Edition has been updated to be even more relevant to the contemporary interests of business knowledge. Additional extras include: - Several more examples are included, plus previous examples have been updated - Improved illustrations and diagrams - Revised presentation makes the book easier to use - Useful summaries of the key points and concepts to aide accessibility - Points of reflection allow the reader to further their thinking on the topics - A glossary of terms - A teacher's manual which can be requested from the book's website

"This book addresses the relevance of knowledge management strategies for the advancement of organizations worldwide"--Provided by publisher.
