As the apparent temperature exceeded 32.4 °C, visitors perceived the environment as being 'warm' or 'hot'. At 'hot' conditions, 36.8 % of European visitors voted for no change to the thermal conditions, which is considerably higher than the response from Australian visitors (12.2 %) and Chinese visitors (7.5 %).

Visitors' perception of thermal comfort during extreme ...

Abstract. Outdoor thermal comfort studies have mainly examined the perception of local residents, and there has been little work on how those conditions are perceived differently by tourists, especially tourists of diverse origins. This issue is important because it will improve the application of thermal indices in predicting the thermal perception of tourists.

Visitors' perception of thermal comfort during extreme ...

Study results suggest that overseas tourists have different comfort perception and preferences compared to local Australians in hot weather based at least in part on expectations. Understanding the...

Visitors Perception Of Thermal Comfort Springerlink

Psychological factors influenced thermal comfort directly. Thermal comfort in summer was improved if a larger amount of trees, water ponds, or shade provisions was perceived in a park. Thermal acceptability in summer was improved by visibility of a larger amount of trees, water ponds, or shade provisions.

On the study of thermal comfort and perceptions of ...

An individual's comfort level in a given environment may change and adapt over time due to psychological factors. Subjective perception of thermal comfort may be influenced by the memory of previous experiences. Habituation takes place when repeated exposure moderates future expectations, and responses to sensory input.

Thermal comfort - Wikipedia

On the contrary, the light wind speeds (WIND) observed, had a positive effect on the thermal comfort perception of park visitors. Individuals are 1.48 times more likely to feel very comfortable if wind speed increases. Finally, the effect of relative humidity (HUM) in the thermal perceptions of users is marginally negative.

Linear Parks along Urban Rivers- Perceptions of Thermal ...

Thermal comfort assessment requires understanding complex interactions between the physical environment, physiology, psychology and behaviour (McGregor 2012). By extension, OTC research should consider an individual's physical condition, and of his or her mental perception and sensation of outdoor climate exposure.

How 'hot' is too hot? Evaluating acceptable outdoor ...

During the survey, we collected data on climate comfort perceptions and the role of the weather on the comfort. Totally, 793 respondents of tourism visitors participated in the study. Our results showed that almost all of visitors (>95%) stated that the weather affected the climate comfort.

The WBGT was used as the thermophysiological index to investigate the effects of thermal conditions on visitor's thermal perception and adaptive behavior in outdoor urban spaces. In this study, behavioral adaptations used by visitors as a means of achieving comfort were evaluated.

Thermal Comfort for Urban Parks in Subtropics ...

Outdoor thermal comfort is important for tourism and landscape design. Many previous studies have identified the thermal comfort range for local residents, but how it differs for overseas visitors is unknown. Improving human thermal comfort is essential as it enhances the quality of urban living and the use of outdoor space. Urban green space has previously been shown to reduce the perception of thermal discomfort under hot conditions.

Landscape variability of Melbourne's botanic gardens and ...

thermal "comfort"), and maximization of acclimatization. Thus, while the first step of thermal design must be to establish what is the range of thermal conditions commensurate with comfort, we must go beyond this basic concern and create conditions that also permit conditions to become stimulating, without causing ill effects to the occupants.
